Art Unit: 1617

Receipt is acknowledged of Declaration and of 8/5/99.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10,30,38,46,55, drawn to Granular feed, classified in class 426, subclass 54.
- II. Claims 11-19,48-54, drawn to mixing preparation, classified in class 514, subclass 29+.
- III. Claims 20-29,32-37,40-45, drawn to organism culture, classified in class 435, subclass 40.5.
- IV. Claims 31,39,47,56, drawn to method of use, classified in class 424, subclass 442.

The inventions are distinct, each from the other because:

The products and processes of Groups I-IV are independent and patentably distinct inventions, as the feeds of Groups I can be made by other processes, and the processes of Groups II and III can produce other products, all of which can be used in methods other sheen of Group IV.

This application contains claims directed to the following patentably distinct species of the claimed invention: feed species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-10 generic.

Art Unit: 1617

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MEP.

§ 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1617

Because these inventions are distinct for the reasons given above and the search required for Group I,II,III, or IV is not required for Group IV,III,II or I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil Levy whose telephone number is (703) 308-2412. The examiner can normally be reached on T-F from 7am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Adams, Ph.D., J.D, can be reached on (703) 308-0570. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-3592.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
